About me

I care about building things that actually work — clean solutions that meet requirements without overengineering. Comfortable across the stack, from low-level systems to ML pipelines.

Areas of Interest

Optimization • Algorithms
Machine Learning • NLP
Compilers • Systems

Languages

Polish	Native
English	C2
German	B1/B2
Spanish	A1

Programming

- Java
- C / C++
- Python
- R

Tools

Git • SSH • Linux (systemd)
Maven • Make • Valgrind
PyTorch • HuggingFace • Jupyter
Pandas • NumPy • LaTeX/Quarto

Education

2023–2027 — **B.Sc. Algorithmic Computer Science**
Student · Wrocław University of Science and Technology
Expected graduation 2026. Focus on algorithms, systems programming, and artificial intelligence.

2025–2026 — **Erasmus Exchange**
Exchange Student · University of Sounthern Denmark (SDU), Odense
Courses: NLP, Statistical Modelling, Linear & Integer Programming, Scientific Programming, Compiler Construction.

Projects

2025 — **NLP: Author Profiling & Native Language Identification**
Python / PyTorch · SDU Erasmus Project
Fine-tuned transformer encoders (DistilBERT, RoBERTa, DeBERTa) with LoRA and hybrid CNN+Transformer architectures across 5 classification/regression tasks.

2025 — **Tree-Walk Interpreter**
Java · Compiler Construction, SDU
Full interpreter for a custom strongly-typed language: lexer, parser, AST, type system, evaluator, and test suite.

2024+ — **Home Server & Automation**
Linux / Raspberry Pi · Personal Project
Started as a Minecraft server, grew into a remote computation node used as a GPU proxy for encoder training during Erasmus. Later expanded to a Raspberry Pi running systemd daemons, Discord bots, and hosted services.

2024 — **A* 15-Puzzle Solver**
C++ · AI Coursework, WUST
Optimal solver using Disjoint Pattern Database heuristics, with low-level C++ optimizations including inlining and memory layout tuning.

2024 — **Chinese Checkers App**
Java · WUST
Client-server multiplayer game with JavaFX GUI, game logic, networking, and replay saving.

2024 — **Unix Shell**
C · OS Coursework, WUST
Shell with pipes, I/O redirection, background jobs, and signal handling.

Courses

2026 MetaHeuristic Methods (WUST) (in Progress)
2025 Linear & Integer Programming and Optimization (SDU)
2025 Statistical Modelling – LMs & GLMs in R (SDU)
2025 Natural Language Processing (SDU)

Certificates

2025 Capgemini: Selected Topics in IT Architecture
2024 Nokia PARO C++ Course

Work Experience

AllRounder – Carcajou Restaurant
Switzerland, Flurlingen | May–Aug 2023

Full-time role in fast-paced gastronomy. Covered all positions from food production to customer service. Recognised for self-organisation and reliability.

Interests

Optimization, NLP, and behavioral design — the engagement engineering. Swimming, cooking, and anything regarding internal combustion.
